

Fire and Security Apprentice

- **40 hours p/w**
- **Field-based, Block Release sessions located in Derby**
- **Qualification Level:** Level 3
- **Duration:** 36 Months
- **Rate of pay:** £7.55ph

We are recruiting for an Apprentice Fire and Security engineer to join our team.

The site-based learning element of the role will be field-based throughout the UK with education based training completed via a Block release arrangement at a training centre located in Derby. Due to the National nature of the role, the successful candidate will need to be willing to undertake occasional travel and some working away for which expenses and accommodation will be paid. Our Head Office is in Nottingham, so occasional attendance here will be required.

This is an exciting and varied role for a unique and vibrant company who place a commitment to their engineer's ongoing training and well-being. The role will be made up of a mixture of servicing, remedial and installation work across Fire, Security, Emergency Lighting and Extinguisher maintenance.

The successful candidate must have the following

- GCSE Level 4 or above in English and Maths as a minimum
- A positive attitude and commitment to excellence
- Excellent communication skills
- Commitment to gaining a full driving licence (if not already possessed)
- Willingness to travel throughout the UK with some periods of time away from home

It would be an advantage to have the following:

- A keen interest or prior knowledge of fire and security systems

Key job responsibilities:

Working alongside a senior engineer within our team, your site based training will involve:

- Servicing and maintaining various fire detection systems, emergency lighting and portable fire extinguishers
- Servicing and maintaining various intruder, CCTV and access control systems.

- Working on large and small installation projects across all fire and security disciplines
- Understanding the requirements of the customer, communicating clearly and reacting efficiently.
- Providing customers with training and demonstrations on systems and educating on the causes and implications of false alarms.
- Taking responsibility for health and safety and adhering to relevant British Standards
- Working proactively and efficiently on your own or as part of a team.
- Maintaining Tay Fire and Security's commitment to excellence in customer service and workmanship and translating this into your role.
- Any other reasonable requests from management.
